

UNGECENTER2610

Description of the project

Ungecenter2610 is a municipal youth school in Rødovre, close to Copenhagen, which offers various activities to its students. The purpose is to help and develop young people's academic, personal, and social skills, and support their learning readiness so that as many as possible are able to complete school and start a youth education.

Our target group is potential all young people between 15 – 25 years old, including those who do not manage to go the straight way through education. Therefore our organisation is dynamic, energetic, cooperative and visionary, and we know how to unite young people's wants and needs with society's overall objectives.

A typical task for volunteers in Youthcenter2610 will be participating in education activities. In the education activities the volunteer will be with a teacher and together with the teacher support the activities. We have lessons where the pupils work in our kitchen, lesson where they do sport, and a lot of excursions, where the volunteer can support the teachers and bring in the international aspect.

Activities which will offer opportunities for the volunteers to develop relations-skills, knowledge about the Danish schoolsystem, teaching experience, and experience in organizing and implementing activities for young people.
